

TUOHI WALL ELEMENT

Design: Tapio Anttila,
interior architect SIO

Private home.
Interior: Tapio Anttila Design

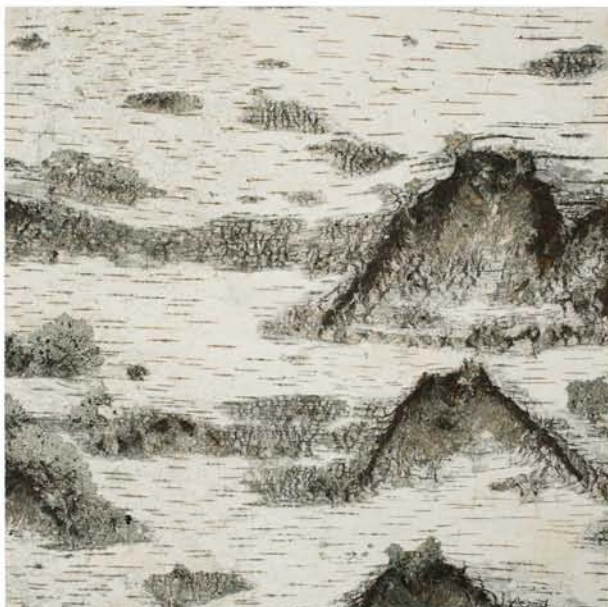

Metso Paper head office, restaurant.
Architect: Architect Office JKMM Oy

TUOHI is Finnish language and means bark of the birch wood. There is a long tradition of making different kind of utility articles of birch bark in Finland. The design of the TUOHI wall element is inspired by that tradition, by using modern technology. Birch is a living organic material and structure, the colour tones and specific patterns are different in every tree trunk. This makes every TUOHI wall element unique. The body of the TUOHI wall element is 12 mm thick MDF-board and surfaces are selected bark of birch (white side).

45 cm

All edges come with interlock joints. The elements can be mounted to the wall construction by nails or glued directly to wall surface.
